

## Waterford Chamber Skillnet Training

**Course Title: IOSH Certificate in Managing Safely**

**Duration: 3 days**

**Trainer: Leyden Consulting Engineers.**

### **For the Trainee:**

#### **Who should attend:**

Managers, supervisors, leaders, safety officers, safety representatives, project managers in any sector in any organization.

#### **Aims & Training Objectives - At the end of the training session participants will be able to:**

- Manage Health and Safety in their teams.
- Understand the importance of managing safely
- Understand the legal requirements for managing safety
- Apply practical risk assessment tools in their workplace
- Contribute to a positive health and safety culture in their organizations
- Partake in accident and incident investigation

#### **Course Outline would include:**

1. Introducing managing safely
2. Assessing risks
3. Controlling risks
4. Understanding your responsibilities
5. Identifying hazards
6. Investigating incidents
7. Measuring performance
8. Protecting our environment

#### **Methodology**

This is class room based high impact interactive training incorporating:

- superb quality animated graphics created exclusively for the course
- a sophisticated but fun presentation
- first class technical content, based on what delegates need to know in practice
- no jargon or off-putting legal language
- clear scenarios that managers can relate to
- a range of training tools, including a board game, DVDs and quizzes

Course evaluation is carried out by means of assessment and project – course work is then validated by the Institute of Occupational Safety and Health (IOSH).

The course contains 8 modules, presented over 3 days.

#### **Accreditation:**

Attendees must attend all modules.

There will be a closed book written assessment on the afternoon of Day 4

Attendees must complete a project (risk assessment based) to be submitted within 2 wks of completion

On successful attendance and completion of assessment and project, attendees will be awarded the IOSH Certificate in Managing Safely

**Trainers:**

Ita Leyden , B.E., M.Sc., C.Eng, C. MIOSH

A Chartered Engineer and Chartered Safety Professional with over 20 years experience in the engineering, training and safety fields. In addition to providing in-company and public training courses, Ita lectures in UCD and WIT in a variety of safety topics including, ergonomics and construction. Ita also works with WIT in the development of academic curricula in relation to health and safety. Ita has extensive experience in the pharmaceutical industry, however, she has also provided expertise to a variety of industry and service sectors, from retail to construction.

Consequently, Ita has been involved in all areas of safety, from litigation and provision of expert witness testimony through to management coaching and training and development of safety management systems.

Lorraine Casey Power, C.MIOSH

A Chartered Member of IOSH (Institute of Occupational Safety & Health) with over 20 years experience in health, safety & environmental management and training function. She has had worldwide responsibility for the roll-out of both internal and external training programs, in addition to delivering extensive HSE training programs locally, nationally and internationally within company and for external bodies - such as UCD, WIT, Chamber of Commerce, and IBEC.
